

FIRSTMILE ADVANTAGE IP PBX

OVERVIEW

"FirstMile Advantage" is an all-in-one, IP PBX phone system for businesses of all sizes. Packed with virtually unlimited features, the "FirstMile Advantage" enables companies to leverage the features and functions of an enterprise-class phone system without the associated expense. "FirstMile Advantage" is an affordable communications solution that is easy to use, easy to manage, scalable, and reliable, while delivering unparalleled functionality.

With "FirstMile Advantage," you connect the way you choose. Our system works with almost all VoIP protocols and the traditional telephone network. Additionally, you have the option to choose IP or standard analog telephones. "FirstMile Advantage" allows you to meet even the most demanding communications needs while providing the highest ROI of any phone system on the market.

A typical FirstMile Advantage IP PBX deployment saves customers an average of 40% - 50% over both traditional and other IP PBX alternatives. In today's economic environment, the FirstMile IP PBX solution is a quickly gaining market share based on reduced cost of ownership, ease of use, and FirstMile's industry leading support.
